

MULTI SWEEP

SWEEPING PROBLEM, NO PROBLEM!

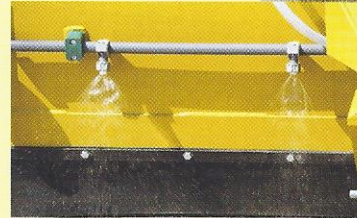

725 QUICK FIT SWEEPER COLLECTOR

- The large debris container in the MultiSweep can be manually or hydraulically opened from within the carrier vehicle.

- The MultiSweep is available with a gravity or a power water spray system to minimise dust while sweeping.

- The side brush is made from a poly/wire mix that cuts through even the toughest lodged debris and weeds from kerbed and walled areas.

- An independent diesel or gasoline Power Pack can be fitted, leaving the MultiSweep free to be operated by any vehicle with forks.

- MultiSweep has a floating broom and fork lock system which allows the sweeper to contour over rough terrain with great ease.
